ORGANIC FERTILIZER NP 3.3 + 15C

- 25 kg bag on 1.625 kg pallets - BIG BAGS 500 kg - LOAD
- It brings organic nitrogen to gradual release
- Contains macro, micro and trace elements in an assimilable form from plants
- Ideal for all terrains
- Rich in humic acids

DOSES AND METHOD OF EMPLOYMENT

CULTURE	DOSES
Vine from wine - Table vine	1300 - 1600 kg/ha
Fruit	1000 - 1600 kg/ha
Kiwi	1600 kg/ha
Vegetables	1000 - 1600 kg/ha
Greenhouse	5000 kg/ha

ALLOWED IN BIOLOGICAL AGRICULTURE

FEATURES

ABOMIN COMPLEX is an organic NP fertilizer based on humified manure and Abomin, with specific characteristics. Thanks to the integration of the two components, **ABOMIN COMPLEX** provides a pool of macro and microelements available for the plant. The presence of humified organic substance favors the availability of the elements contained in Abomin that otherwise would remain insoluble in the soil.

ABOMIN COMPLEX is particularly indicated in the fertilization of horticultural crops both in the greenhouse and in the open field, of the ornamental plants, of the fruit crops and of the vineyard.

ABOMIN COMPLEX is also rich in humified organic matter and therefore promotes the maintenance of soil fertility and guarantees an important supply of humic and fulvic acids.

COMPOSITION

Organic Nitrogen (N)	3%
Total phosphorus pentoxide (P2O2)	3%
Organic carbon (C) of biological origin	15%
Organic substance	25%
Maximum humidity	12%
Raw materials: Abomin, dried bovine manure and dried pollen, not from industrial farms, meat and bone meal	

The product must not be put in contact with the roots of the plant. Product for professional use only. Keep out of reach of children and animals.

Keep in a dry and sheltered place
