dust

## FOR ROOT APPLICATION ON ALL CROPS

### PRODUCT PRESENTATION:

25 kg net weight Big Bag 750 kg bags

The product and all its components can be used in organic farming, pursuant to EC regulation 834/2008 authorisation not required pursuant to ministerial decree no. 18345 of 27 November 2009

### DOSES AND METHOD OF EMPLOYMENT

CULTURE	DOSES
Vine from wine - Table vine	800 kg/ha
Fruit	600 - 800 kg/ha
Kiwi	800 kg/ha
Vegetables	600 - 800 kg/ha
Greenhouse	2000 kg/ha

### FEATURES

Due to its physical structure, **DUST (rock powder)** is able to help the plant against temperature changes, as it covers it with a very persistent and adhesive coating. Due to its physical nature, the product prevents the development of pathogens through an indirect effect on the plant. **DUST (rock powder)** also has a pH buffering effect. Its positive action manifests itself especially in acidic soils.

### ALLOWED IN BIOLOGICAL AGRICULTURE

### DESCRIPTION

Manufacturer	Laguna Santa Teresa S.A.
Country of Origin	Paraguay
Formulation (ppm)	P: 7200 / Mo: 0,4 / Mn: 1160,8 / B: 1,29 Ca: 56200 / Mg: 16200 / Si: 3834 / S: 200 / Zn: 119 FE: 3952 / Co: 31 / Ni: 5,3 / Cu: 48,74 / K: 7200...
Appearance	Shape of soil particles
pH, 10% solution (Potentiometric pH-meter)	7,01
Solubility	Insoluble in water - completely soluble (100%) in soil
Granulometry (TYLER Standart 1910 screen)	44 Microns - 0,044 Millimetres (mm)
Toxicity	Nothing
Humidity (weight loss at 105°C)	1,83 g/100g
Biodegradability	100%
Density	1,68 gr/cm <sup>3</sup>

## APPLICATION

---

Complete nutrition in the soil, with high content of secondary elements (micro- and trace elements). The presence of all the elements needed by plants enables balanced and complete adsorption. Its positive action is especially noticeable in acidic soils. Suitable for all crops requiring high nutrient uptake. Authorised in organic and biodynamic agriculture.

## CONSERVATION

---

Taking into account its hygroscopic characteristics (it absorbs moisture), the product should be stored in cool, dry places with good ventilation, preferably on pallets, avoiding contact with the floor. Due to its characteristics it has no expiry date.

## PRECAUTIONS FOR USE

---

**DUST (rock powder)** is a natural product and never phytotoxic. It is harmless for humans, the environment and animals. Store the container tightly closed in a dry, cool place. Store away from light and at temperatures between 5° C and 50° C. Any improper use other than good agricultural practice is forbidden. Product for professional agricultural use only.

### Responsible for marketing:

Abomin SP sl - Calle Mermosilla - 28001 Madrid - Spagna

### Production facility:

Laguna Santa Teresa S.A. - Cnel. Espiritu . Aranda - ASSUNCION (PARAGUAY)
