## superfine

### FOR FOLIAR APPLICATIONS ON ALL CULTIVES

#### PRODUCT PRESENTATION:

5 kg net weight bags

The product and all its components can be used in organic farming, pursuant to EC regulation 834/2008 authorisation not required pursuant to ministerial decree no. 18345 of 27 November 2009

#### DOSES AND METHOD OF EMPLOYMENT

50 - 100 kg per hectare  
 5 kg per hectare per treatment  
 10 - 20 applications (pre and post flowering)  
 Apply with water or dry

#### FEATURES

**SUPERFINE (rock powder)** thanks to its physical structure is able to help the plant against temperature changes, as it covers it with a very persistent and adhesive coating. Due to its physical nature, the product prevents the development of pathogens through an indirect effect on the plant. **SUPERFINE (rock powder)** also has a buffering effect on pH. Its positive action is especially noticeable in acidic soils.

#### ALLOWED IN BIOLOGICAL AGRICULTURE

DESCRIPTION	
Manufacturer	Laguna Santa Teresa S.A.
Country of Origin	Paraguay
Formulation (ppm)	P: 7200 / Mo: 0,4 / Mn: 1160,8 / B: 1,29 Ca: 56200 / Mg: 16200 / Si: 3834 / S: 200 / Zn: 119 FE: 3952 / Co: 31 / Ni: 5,3 / Cu: 48,74 / K: 7200...
Appearance	Shape of soil particles
pH, 10% solution (Potentiometric pH-meter)	7,01
Solubility	Insoluble in water - completely soluble (100%) in soil
Granulometry (TYLER Standart 1910 screen)	10 Microns - 0.010 Millimetres (mm)
Toxicity	Nothing
Humidity (weight loss at 105°C)	1,83 g/100g
Biodegradability	100%
Density	1,68 gr/cm <sup>3</sup>

## APPLICATION

---

Complete foliar nutrition with high content of secondary elements (micro- and trace elements). The presence of all elements needed by plants enables balanced and complete adsorption. Suitable for all crops requiring high nutrient uptake. Authorised in organic and biodynamic agriculture.

## CONSERVATION

---

Taking into account its hygroscopic characteristics (it absorbs moisture), the product should be stored in cool, dry places with good ventilation, preferably on pallets, avoiding contact with the floor. Due to its characteristics it has no expiry date.

## PRECAUTIONS FOR USE

---

**SUPERFINE (rock dust)** is a natural product and never phytotoxic. It is harmless for humans, the environment and animals. Store the container tightly closed in a dry, cool place. Store away from light and at temperatures between 5° C and 50° C. Any improper use other than good agricultural practice is forbidden. Product for professional agricultural use only.
